DETAILED ACTION

Introduction

1. This action is responsive to the amendment filed on 20 May 2002. The amendment added new claims 40-49. Currently, claims 32-49 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 36, 37, and 39 are rejected under 35 U.S.C. 102(e) as being anticipated by Agarwal (US 6,218,256).

Agarwal discloses a capacitor construction comprising: a first capacitor electrode 12 over a substrate 10 (fig. 7); an insulative barrier layer 16 to oxygen diffusion over the first electrode, the barrier layer comprising a chemisorption product of first and second precursor layers (fig. 7 and col. 8, line 46 – col. 9, line 12); a capacitor dielectric layer 14 over the first electrode; and a second capacitor electrode 18 over the dielectric layer and the barrier layer (fig. 7).

Art Unit: 2822

The barrier layer has a thickness of less than about 12 angstroms (col. 5, lines 30-35).

The barrier layer exhibits a K factor of greater than about 7 at 20°C.

Allowable Subject Matter

4. Claims 32-35 and 40-49 are allowable. Claim 38 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 32-39 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2822

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
